Ashutosh Kumar

PMP® | Agile Project Manager | Scrum Master | Project Management
Hyderabad, Telangana, India

Summary

With extensive technical expertise and project management skills, I have over 12 years of rich experience in the IT industry. From requirement gathering to user acceptance testing phase, I've been involved in end to end deployment of multiple projects in the past. Recently, I have been involved in driving automation by helping teams implement DevOps for faster product roll outs with reduced defect leakage.

I have successfully led agile teams of developers & testers through various stages of project lifecycle & delivered the project. I have solid technical expertise in areas like software development, web app development using Java and front end technologies (HTML5, CSS3, jQuery, Vanilla JS) and have successfully translated user requirements into usable products in the past. I'm well versed with tools like JIRA, Microsoft Project for project management and GitLab for DevOps.

Along with my sharp technical skills, I have hands on project management experience with successful project deliveries under my belt. From managing project time lines and risks, to task scheduling and team management, I have helped deliver projects in an agile working environment. I have experience in stakeholder management and have worked with global clients from diverse backgrounds from both offshore and onsite locations.

With my technical expertise, business acumen and project management skills, I can help organizations translate ideas into products and solutions. If you are looking for a project manager who can not only manage projects and teams but also pull up their socks and code, your search might just stop here.

Drop me an email ashutosh.kumar1089@gmail.com and let us work towards realizing your goals.
